EXAM ASSIGNMENT PAPER

Candidate Name: _____ Roll Number: _____

Class Section: _____ Date: _____

General Instructions:

1. Read all questions carefully before answering.
 2. Answer in the designated spaces or sheets clearly.
-

Section A: Short Answer and Diagram Questions

(Instruction: Answer all questions in this section. Each short answer question carries 2 marks, and the diagram question carries 1 mark.)

- Q1. Define electricity in simple terms. [Marks: 2] (Easy)
- Q2. Name two materials that are good conductors of electricity and two materials that are good insulators. [Marks: 2] (Easy)
- Q3. List two important electrical safety rules you should follow at home. [Marks: 2] (Easy)
- Q4. Draw a simple electric circuit showing a cell, two wires, and a bulb. [Marks: 1] (Easy)

Section B: Long Answer and Numerical Problems

(Instruction: Answer all questions in this section. The long answer question carries 1 mark, and each numerical problem carries 3 marks.)

- Q5. What is the main purpose of a switch in an electric circuit? [Marks: 1] (Easy)
- Q6. A simple circuit needs a cell, two wires, and a bulb to light up. If you want to add a switch to control the light, how many total components will be in your circuit? [Marks: 3] (Easy)
- Q7. You have a list of materials: copper wire, plastic spoon, rubber band, and aluminum foil. If you test them for electrical conductivity, how many of these would allow electricity to pass through? [Marks: 3] (Easy)
- Q8. At home, there are 6 electrical sockets. If 2 of them are covered with safety caps, how many sockets are left uncovered and potentially accessible? [Marks: 3] (Easy)
